

Title: Chicago Bike Share

Author: Ethan Pointer, Wyatt Guthrie, Dominic Nolf, Kyle Keaton, Matt Calhoun

Summary:

The objective of this app is to analyze Chicago's bike sharing system to determine which stations have the highest in and outflow and to determine any additional factors that may affect ridership. The app allows you to see total ridership and average in/out flow per station via a graph and bi-variate symbols. Additional layers available include subway stations, bike paths, and a heatmap.
